Search Strategy Builder

http://www.library.arizona.edu/help/tutorials/searchBuilder.html

Example for SWK 736

The Search Strategy Builder is a tool designed to teach you how to create a search string using Boolean logic. While it is not a database and is not designed to input a search, you should be able to cut and paste the results into most databases' search boxes.

Click to create a Search Statement!

(veterans OR military personnel OR soldiers) and (homeless* OR undomiciled) and (policy OR legislation OR laws)
